LIBRARY ACQUISITIONS

WATER, LAND AND PEOPLE by Bernard Frank and Anthony Netboy. New York, Knopf, 331
1950. 29¢ F85.

"The authors paint the dramatic picture of our mounting water troubles and the consequences for life in America. Before man laid careless hold of it, the land was a bountiful sponge. Then came those who tampered with the fine balance of nature. Each misdeed was small, but the cumulative effort was to destroy topsoil, start erosion, increase floods, silt rivers and reservoirs and lower the store of water in the American earth. Now the land is not a sponge, but a drainboard... Readers will be able to see their own familiar neighborhood as they never have before. The book ends with a series of specific recommendations for the solution of our water problems." Book Jacket.

"THE LAND IS MINE" FROM TENANCY TO FARM OWNERSHIP by Paul V. Maris. U.S. Dept. of Agriculture. Agriculture Monograph 18. 387 p. Washington, 1950.

"Early day settlers planted the mudsills of the governmental structure we have today. The growth of the country was rapid. It gradually became more and more industrialized. It increased enormously in wealth. From simple beginnings, it increased in power and position. But in the process of transformation, our country neglected the vital element of home ownership. Farm tenancy began to increase. This was aggravated, especially in the South, by the War between the States. It gradually increased until a majority of the farms of the United States were operated by tenants. Discussions began in the hope of finding a solution. The present legislation is the outgrowth of this discussion." Marvin Jones - Co-author of the Bankhead-Jones Farm Tenant Act.
